

901 International Pkwy STE 100

Lake Mary, FL 32746

March 17, 2024

Dear reader,

I am writing in response to a message I received about applying to Deloitte. I believe my experience both in school and personal projects reveals me to be a strong candidate for the Solutions Analyst (Software Developer).

My education at UCF provided me with a solid foundation for the developmental process. Although I learned from UCF, a considerable amount of my knowledge and experience has come from personal projects. I have focused on Java and MySQL and developed multiple tools and plugins for various uses. At my current part time position, I created a desktop program to automate many of my responsibilities.

While my position at Rare Patient Voice is official a "Data Entry Specialist" I have worked hard to create automation tools. I have reverse-engineered APIs, worked with Oath2 flows, and created a user friendly interface. Because of my tool, I am able to process/validate more than twice the number of profiles a day as before. Not only that, but I continue to update it and add more features. I'm always looking to improve it.

The included resume provides an overview of both my education and personal experience. I would love to learn more about this position and possibly secure an interview. You can reach anytime at 407-766-8246 or at micahpuccioball@gmail.com. I look forward to hearing your response.

Yours truly,

Micah Puccio-Ball
